AI | Product | Data

London, UK | (+44) 7586 360286 | mateenfathah@gmail.com | [LinkedIn](#)

PROFILE

Master's in Management graduate specialising in Finance, with a BSc in Data Science and experience across AI governance, product research, workflow automation and data analysis. Co-founded SyncScore, mapped AI agent behaviour to major regulatory frameworks and analysed product positioning and compliance requirements. Built data workflows using n8n, APIs, Python, SQL and Excel.

EDUCATION

Hult International Business School

Master's in Management | Finance Specialisation

London, UK

Sep 2025 - Aug 2026

Selected coursework: Design Thinking and Innovation | Business Impact | Private Equity | Valuation | Mergers and Acquisitions (M&A) | Investment Banking | Corporate Finance | Finance Management Systems | AI Strategy | Business Insights with Data | Accounting for Managers

University of Westminster

BSc Data Science and Analytics

London, UK

Sep 2020 - Aug 2023

SQL, Python, machine learning, statistical inference and data visualisation; capstone: LSTM neural network stock prediction

PROFESSIONAL EXPERIENCE

SyncScore

Co-Founder and Managing Director

London, UK

Jan 2026 - Present

- Built a compliance framework mapping AI agent behaviour to EU AI Act articles 9, 10, 13, 14, 15, 52 and 61, ISO 42001 clauses and NIST AI RMF requirements.
- Produced compliance gap analyses, risk prioritisation reports and remediation roadmaps, communicating findings to senior non-technical stakeholders including CROs and CCOs.
- Profiled Vanta, Drata and Patronus AI across product capability, pricing and regulatory positioning to inform product differentiation and go-to-market decisions.
- Tracked EU AI Act deadlines and guidance updates in a central repository connecting regulatory requirements with technical implementation criteria.

GoGlobal

Finance Automation Specialist Intern

Remote

May 2026 - Aug 2026

- Designed an n8n and Xero API workflow for Accounts Receivable Ageing across 24 legal entities, replacing a 60-90 minute weekly manual process and documenting build, reconciliation and security logic.
- Mapped Soldo API and BlueOcean 2 data fields for a quarterly KPI report and created the extraction approach, delivery timeline, stakeholder deck and technical workflow documentation.
- Linked Excel and PowerPoint through SharePoint so monthly board-report charts refreshed when source actuals were updated.

The Lalit London

Client Relations and Operations

London, UK

Mar 2024 - Mar 2026

- Managed high-volume stakeholder communication, produced operational documentation and maintained 100% accuracy in financial reconciliations using Opera PMS and Excel.

SELECTED PROJECTS

LinkedIn x Hult B2B Challenge | Runner-Up | Case Study

- Designed an ROI Calculator, Video Precision Score and Pipeline Attribution Engine; delivered a strategy document, live product demo and pitch deck to senior LinkedIn judges.
- Built a five-year model whose case-study outputs included \$12,677M Year 3 revenue, \$6,111M NPV at 10% WACC and 164x ROI.

Intuit QuickBooks Market Research and Regulatory Analysis | Case Study

- Sized a 1.4M sole-trader market, analysed competitors and built financial projections, churn modelling and pricing sensitivity analysis for an industry judging panel.

Multi-Asset Investment Portfolio Analysis | Data and Financial Analysis

- Built an Excel model covering seven equities across more than four years; calculated risk-return and sector-diversification metrics and produced an investment summary with data visualisations.
